ASSET MANAGEMENT

LEVERAGE THE POWER OF YOUR
AGRICULTURAL LAND

No asset class has unilinear movement. However, in case of finite resources like land, there is a likelihood of an exception. Therefore, civilizations from ages across the globe had developed across rivers or seas, adjacent to which there were huge tracts of fertile land mass. Owning land, though has faded in its significance in the last century with the advent of modern age, its sheen has not completely vanished. Rather, commercialization of agriculture has prompted people to invest in agriculture. Also, rise in urbanization is giving rise to craving of people to escape from city life and take their time off in serene rural environment. This is giving rise to concepts like ecotourism, leading to setting up of farmhouses in the outskirts of the city.

WHY OWN A MANAGED FARMLAND ?

At Dharitri Agriculture, we combine a passion for agriculture with social responsibility and economic returns. As much as we're focused on soil health, water conservation and the impact we have on the environment, we don't shy away from higher yields. This dual approach allows us to take on the traditional without disregarding the modern. Meticulous planning and continual innovation keep us on the path to a sustainable greener future.

Experience: With over 12 years of involvement with the food and refreshment industry, and has worked with in excess of 15 states, Dharitri is proficient to give shrewd, fast, and adaptable arrangements tailor-made.

WE BELIEVE IN FUTURE OF IN AGRICULTURE

We believe in the future of agriculture” because of the need for food and the dependence of the people on the farmers to produce this food.

Present- developed new farming methods which makes them capable of producing more food per farmer than any farmer in the world.

With agriculture as diverse as it is, these seven words take on a different meaning for each person that reads them.

Our own purpose is to serve agriculture, today and tomorrow.
